

the barista's choice

How to clean a blender

Keeping your blender clean is really easy and only takes about 10 mins once a week.

- **Step 1**

Unplug motor
this may seem
obvious, but
not to everyone!

- **Step 2**

Lay machine on
bench – it's the
safest way.

- **Step 3**

Carefully pull
motor out of
sound surround
and black casing.

- **Step 4**

Thoroughly clean black motor enclosure
This is very important.
As water takes the path of least resistance, and a build up of dirt will break the seal.

BE VERY
CAREFUL NOT
TO GET
MOTOR WET

- **Step 5**

Thoroughly clean
black motor
enclosure

- **Step 6**

Carefully
remove and
thoroughly
clean gasket.

- **Step 7**

Carefully
remove and
thoroughly
clean gasket.

**BE VERY CAREFUL
NOT TO GET
MOTOR WET**
Liquid damages
VOIDS warranty

- **Step 8**

With a warm
damp cloth
CAERFULLY wipe
down motor
